

THERE IS SOMETHING WRONG

*It isn't because flower power didn't work
It's only the beginning
We're just an inception of revolution
We're just the beginning of change*

Giving birth to the sixties future

Verse 1

I have a new dream
So let's try again
Everyone that plays with me and shares the purest
ecstasy
Of picking all the tunes from above
Blessed with gifts, the choice to choose
A new world of joy
Instead of
Being stuck in all the bad believes

If your spirits high
You're almighty high
I will be yours forever
And if you dig my sounds
Give me strength to bounce
Back with some human nature

Chorus 1

There's something wrong
But don't you be scared
There will be love
Where we are going soon
(And there will be)
A colourful space
A unified race
This is where we belong
There's something wrong

Verse 2

All the conflicts in our little human world
They are not about religion
(Because)
All religions, they have killed
Replaced innocence with guilt
In the name of their gods

What does it take
To get awake
What does it mean
When you tell me that you still believe
When you tell me that you still believe
In the naked monkeys mind

Chorus 2

There's something wrong
But don't you be scared
There will be love
Where we are going soon
(And there will be)
A colourful space
A unified race
This is where we belong

(There's something wrong)
But don't you be scared
There will be love
Where we are going soon
(And there will be)
A colourful space
A unified race
This is where we belong
